

JOB TITLE

Web and Mobile Developer – Excellent career prospects!

PURPOSE OF POST

We are a growing software development company specialising in creating web applications and mobile apps. Due to continued expansion, we are looking for an experienced Web and Mobile Developer (main skills are PHP/MySQL) to join our team in the Wetherby office on a permanent basis. Any experience of requirements gathering, system architecture, and project management would be beneficial as we're looking to grow this role into a more senior position.

You'll be working in a fast moving environment working with the latest interesting technologies. E.g. A location based social networking site, augmented reality on iPhone's, and working with the new Windows Phone 7. Any experience of mobile App development and HTML5 would be a huge advantage but a willingness to learn new technologies is just as important.

We have a small but friendly team and a supportive friendly environment where you can make the most of your skills and develop them further. We are looking to really grow the business in the next couple of years (we've already rapidly grown in the last year) and are looking for dynamic and motivated employees to share in our success.

REQUIRED SKILLS

You'll require an excellent understanding of PHP and MySQL as well as other common technologies such as Javascript, jQuery, and AJAX. We're looking for at least 2 years experience of web software development and an ability to learn new skills quickly. Experience of any other technologies, frameworks, or languages (especially native App development across iOS, Android, Blackberry, WebOS, or Microsoft .NET, Silverlight, Umbraco CMS) would be really beneficial.

BENEFICIAL SKILLS

Practical experience of requirements gathering and project management.
Experience of native iPhone and/or other mobile development platforms.
Any knowledge of Linux/Windows Server configuration and maintenance.
